Description			
<p>Since solving #7590 it is possible to logically combine Restrictions by AND and OR. To allow for really flexible search filters is is required to support grouping of Restrictions, so that expressions like this are possible:</p> <pre>Restriction-a OR (Restriction-b AND Restriction-c)</pre> <ul style="list-style-type: none">• Create abstract AbstractRestriction as base class for Restriction• Create RestrictionGroup as subclass of AbstractRestriction• implement handling of RestrictionGroups in eu.etaxonomy.cdm.persistence.dao.hibernate.common.CdmEntityDaoBase.addRestrictions(List<Restriction<?>> restrictions, DetachedCriteria criteria)
