Description

Media types are currently represented as:

- Antigua and Barbuda. Holotype,

After the comma data is missing.

Media types should be rendered in the following form depending on their type:

- **unpublished** (has collection information): "[icon] {collection} {accession_number}" in case the media url is set the accession number can be rendered as link in webapplications
- **published** (no collection information): "[icon] {ref_detail} in {reference}" in case the media url is set the ref_detail can be rendered as link in webapplications
