Description			
100002 Planothidium taeansa 100003 Planothidium naradoense			
sind im Vaadin Editor über die Nummer suchbar http://test.e-taxonomy.eu/cdmserver/phycobank_production/app/registration#!list/all			
Diese Nummern sind über die Nummer nicht im Portal auffindbar: http://test.e-taxonomy.eu/dataportal/preview/phycobank/cdm_dataportal/search/registration/?identifier=100008&taxon_name=&type_designation_status%5B%5D=0&op=%EF%80%82&form_build_id=form-8vOZJ9fVkJilElf_pkbzdAPjcxfdpra_zeim6m0J4Y&form_id=cdm_dataportal_search_registration_form			
(Es könnte noch bis zu 9 weitere Nummern betreffen, also kein generelles sondern ein spezielles Problem)

This happens because the dataportal sends an empty querystring for the scientific name and the webservice is not ignoring empty strings.

ID-Suche = Perfekt, alle 10 Fälle, in denen keine Anzeige erfolgte, funktionieren jetzt über die ID-Suche

Was im Augenblick noch nicht im Portal funktioniert, ist die Namenssuche der oben genannten Namen.

Sorry, habs auf Progress zurückgestellt.

The search behaves correctly. "Planothidium taeansa" is not found because there is no registration for the name "Planothidium taeansa" only for the Holotype:

The screenshot shows a registration entry in a dark-themed interface. At the top left, there is a 'Published' status indicator. The main text of the entry reads: 'Planothidium taeansa R. Jahn & N. Abarca'. To the right of this text is a 'Type:' label with a lightning bolt icon, followed by the location 'Korea, Republic of, ChollaNamdo'. Below this, there is a detailed description: 'Creek at Temple TaeAnSaat Tae An Sa, alt. 299 m, 35°7'52.611"N, 127°23'18.924"E, R. Jahn & B. Suh D26. Holotype, (B 40 0040801). <http://phycobank.org/100002>'. On the far right, there are several small icons, including a refresh icon, a warning icon, and a '0' icon.

To me this looks like incomplete data. Is this really a registration for a type designation only?

The intended behavior of the name search is to search for registrations where the registered name matched the query string. The typified names associated with the typedesignations are not covered by this search. Maybe we need to extend the search so that the typified names are also included? Maybe as optional search mode or should this be the default?

We definitely need to extend the search so that typified names are also covered by the search. ... new ticket: [#7621](#)
