

EDIT - feature request #7637

feature request # 4719 (New): [MASTER] Implement IntextReference

Handle intext references in CDM light

08/08/2018 02:28 PM - Andreas Müller

Status: In Progress	Start date:
Priority: Highest	Due date:
Assignee: Katja Luther	% Done: 0%
Category: cdmadapter	Estimated time: 0:00 hour
Target version: Release 5.46	
Severity: normal	

Description

During cdm light export we may want to handle intext references correctly.

As a first step we simply should remove the tags (but not the text in the tags) to make them look correctly for publication.

Additional we should include related cdm instances (references, sources, taxa, names, keys, ...) to the according output so the publication software can finally create links to the according instances if wanted.

The same could be done for other exports such as DwC-A so the mechanism should be generic.

Revision 2d006ce7 - 08/08/2018 02:51 PM - Katja Luther

filter intext references in cdmlight export

History

#1 - 08/08/2018 02:57 PM - Katja Luther

the filter is implemented and is the default, with the configurator it is possible to configure, that needs to be implemented in taxeditor

#2 - 08/08/2018 02:57 PM - Katja Luther

- Target version changed from Unassigned CDM tickets to Release 5.2
