

EDIT - feature request #7675

Make columns with default values togglable

08/22/2018 02:50 PM - Patrick Plitzner

Status: Rejected	Start date:
Priority: Priority14	Due date:
Assignee: Andreas Müller	% Done: 0%
Category: taxeditor	Estimated time: 0:00 hour
Target version:	
Severity: normal	
Description Columns that have default values defined in a taxon description should have a function to toggle their visibility

- Target version changed from Release 5.22 to Release 5.25

#8 - 07/09/2021 10:20 AM - Andreas Müller

- Target version changed from Release 5.25 to Release 5.45

#9 - 10/22/2021 11:33 AM - Katja Luther

- Status changed from New to Feedback
- Assignee changed from Katja Luther to Andreas Müller

I do not understand the intention of this ticket, if a default value exist no exact values from the specimen should be entered?

#10 - 11/02/2021 11:03 AM - Andreas Müller

- Status changed from Feedback to Rejected
- Target version deleted (Release 5.45)

In general it should be possible to allow overriding a default value. The idea behind is that a default value sometimes is only used to avoid entering data e.g. if 95% of the specimens of a higher taxon have the same value we may want to only enter those data which are deviating (assuming that all others have the same default value). On the other hand, if a default value is valid for 100% of the specimens it is a general character value for the higher taxon and we may remove the column from the matrix if the matrix includes only taxa that are covered by this default value. This is for simplifying the matrix during editing.

However, default values are currently not yet much in use and also in larger matrixes we often don't have default values that cover **all** taxa of the matrix therefore this ticket is probably not really urgent.

Therefore I suggest to close this ticket as wontfix and open a new one with more specific description once it is needed.

@Norbert: do you agree?
