Target version:	Unassigned CDM tickets		
Severity:	normal		

Description

To make agents (persons, teams, institutions) linkable and give an overview on all data available on an agent we need a data portal page which shows all the data related to an agent such as

- agent metadata (name, dates, addresses, ...)
- external links
- references he/she is author of
- taxon names he/she is author of
- specimen he/she is collector of
- ... all other usages

Maybe we can start with Person and Team as these are the most frequently used classes.

We may also want to have a search page where one can search in all existing names to directly find an author (feel free to create new ticket if needed)
