

EDIT - feature request #7707

Handle title / titleCache similar to Media in Classification and other classes

08/30/2018 11:13 AM - Andreas Müller

Description			
In #7705 the best way to handle i18n-title and titleCache in the UI for classes with "simple titleCache" (titleCache generated only from title field if not empty) is described. We should probably implement it the same way for other classes like Classification.			
Also there are IdentifiableEntity someclasses which have similar but not equal data structures like			
<ul style="list-style-type: none">• DescriptionBase (an i18n title field is missing)• DescriptiveDataSet (Set instead of i18n title)• FeatureTree (Set instead of i18n title)• Institution? ("name" is not i18n)• Collection? ("name" is not i18n)• PolytomousKey (no i18n title)• maybe even TermBase? (uses Set instead of i18n title)			
=> these probably need model change before implementation: #7708
