Description

Problem 1

In einem WorkingSet (Buch) sind Dutzende Arten neu beschrieben. Die Buchreferenz sollte ein mal vorhanden sein und das Section-Autorenteam "Kulikovskiy & Lange Bertalot". Anscheinend wird bei jeder Auswahl des vorhandenen Section-Autorenteams eine neue Zeile in die Auswahlliste geschrieben was sehr unübersichtlich wird.

Problem 2 ist ein einfaches Datenproblem.

Besonders bei Altdaten überarbeite ich die Referenzen teils mehrfach, auch in unserem Projekt habe ich angefangen Autoren in Iconogr. Diatol. Nummer einzugeben, obwohl es die Section-Autoren in einem Buch sind, das Teil einer PrintSeries mit ISBN ist. Bei Umstellung auf die vollständig bibliographisch korrekte Zitierung entsteht viel Datenschrott ("D"), der in der Auswahlliste bleibt. Problem 2 ist eher inhaltlich durch Datacleaning zu lösen?
