<b>Target version:</b>	Release 5.4	<b>Found in Version:</b>	
<b>Severity:</b>	normal		

#### Description

Unpublished data visible in Portal, not in scientific name search, but as list under a reference including published names.

Also: The reference page currently shows rejected and other unpublished Registrations, this must not happen!

Example:

[http://test.e-taxonomy.eu/cdmserver/phycobank\\_production/app/registration#!workingset/305e2983-f7c2-4d62-9418-1706edb895c2](http://test.e-taxonomy.eu/cdmserver/phycobank_production/app/registration#!workingset/305e2983-f7c2-4d62-9418-1706edb895c2)

Unpublished Scientific name: "Iacusbaicalensis", (genus name not filled, editorial notice)

Problem: Reference with published names already in PhycoBank pulished.

Name search for string "Iacusbaicalensis" not possible (=correct, <http://phycobank.org/100301>)

Name search for "Staurosirella sigara" ist possible (=correct, <http://phycobank.org/100296>), Reference for both names is: Kulikovskiy, M. & Lange-Bertalot, H. - in Kulikovskiy, M., Lange-Bertalot, H. & Kuznetsova, I. V., Lake Baikal: Hotspot of endemic diatoms II. Iconographia Diatomologica, 26: [1]-656. 2015

Under this reference all names (published AND unpublished) are listed (unpublished see arrows in screen shot).

How big is the problem? At the moment only References which are published and in the process of post publication registration are affected.
