

EDIT - bug #7783

NamePopupEditor new buttons for genus and species

09/21/2018 01:25 PM - Andreas Kohlbecker

Status:	Closed	Start date:	
Priority:	New	Due date:	
Assignee:	Andreas Kohlbecker	% Done:	100%
Category:	cdm-vaadin	Estimated time:	0:00 hour
Target version:	Release 5.4	Found in Version:	
Severity:	normal		
Description For species the genus can only be selected from existing genera. In order to use a not existing genus it is currently required to start a new registration from scratch. Having a new button at the combobox would be much more convenient and is easier for inexperienced users. The same accounts for the species combobox. A registration for the new name needs to be create also automatically. This registration should be a blocking registration to the registration being edited currently.

Button new exists for genus, but seems to be without function (same form reloaded).
Functionallity for genus and species is highly appreciated.

#4 - 10/23/2018 01:16 PM - Wolf-Henning Kusber

Correction: Button new exists for genus, a new form is loaded. It should be pre-selected as "genus" or "species" respectively. For users it is not clear that this form is for entering the missing name.

It should be pre-selected as "genus" or "species" respectively.

it works exactly like that!

For users it is not clear that this form is for entering the missing name.

This will be solved by [#7846](#)
