

EDIT - bug #7842

TaxonNamePopEditor: adding new name as replaced synonym to name with basionym causes NonUniqueObjectException

10/23/2018 11:26 AM - Andreas Kohlbecker

Status:	Closed	Start date:	
Priority:	Highest	Due date:	
Assignee:	Andreas Kohlbecker	% Done:	100%
Category:	cdm-vaadin	Estimated time:	0:00 hour
Target version:	Release 5.4	Found in Version:	
Severity:	major		
Description			
This case is not expected to occur often in real live situations:			
A name has a basionym with authorship <i>A</i> . Adding replaced synonym for which a new name is created whereas the replaced synonym shares the same authorteam <i>A</i> with the basionym leads to a NonUniqueObjectException when saving.			
Adding an existing name with the the same authorteam <i>A</i> is not causing the exception			
Caused by: org.hibernate.NonUniqueObjectException: A different object with the same identifier value was already associated with the session : [eu.etaxonomy.cdm.model.agent.Team#277] at org.hibernate.engine.internal.StatefulPersistenceContext.checkUniqueness(StatefulPersistenceContext.java:648) at org.hibernate.event.internal.DefaultSaveOrUpdateEventListener.performUpdate(DefaultSaveOrUpdateEventListener.java:284) at org.hibernate.event.internal.DefaultSaveOrUpdateEventListener.entityIsDetached(DefaultSaveOrUpdateEventListener.java:227) at org.hibernate.event.internal.DefaultSaveOrUpdateEventListener.performSaveOrUpdate(DefaultSaveOrUpdateEventListener.java:92) at org.hibernate.event.internal.DefaultSaveOrUpdateEventListener.onSaveOrUpdate(DefaultSaveOrUpdateEventListener.java:73) at org.hibernate.internal.SessionImpl.fireSaveOrUpdate(SessionImpl.java:648) at org.hibernate.internal.SessionImpl.saveOrUpdate(SessionImpl.java:640) at org.hibernate.engine.spi.CascadingActions\$5.cascade(CascadingActions.java:218) at org.hibernate.engine.internal.Cascade.cascadeToOne(Cascade.java:398) at org.hibernate.engine.internal.Cascade.cascadeAssociation(Cascade.java:323) at org.hibernate.engine.internal.Cascade.cascadeProperty(Cascade.java:162) at org.hibernate.engine.internal.Cascade.cascade(Cascade.java:111) at org.hibernate.engine.internal.Cascade.cascade(Cascade.java:61) at org.hibernate.event.internal.DefaultSaveOrUpdateEventListener.cascadeOnUpdate(DefaultSaveOrUpdateEventListener.java:358) at org.hibernate.event.internal.DefaultSaveOrUpdateEventListener.performUpdate(DefaultSaveOrUpdateEventListener.java:332) at org.hibernate.event.internal.DefaultSaveOrUpdateEventListener.entityIsDetached(DefaultSaveOrUpdateEventListener.java:227) at org.hibernate.event.internal.DefaultSaveOrUpdateEventListener.performSaveOrUpdate(DefaultSaveOrUpdateEventListener.java:92) at org.hibernate.event.internal.DefaultSaveOrUpdateEventListener.onSaveOrUpdate(DefaultSaveOrUpdateEventListener.java:73) at org.hibernate.internal.SessionImpl.fireSaveOrUpdate(SessionImpl.java:648) at org.hibernate.internal.SessionImpl.saveOrUpdate(SessionImpl.java:640) at org.hibernate.engine.spi.CascadingActions\$5.cascade(CascadingActions.java:218) at org.hibernate.engine.internal.Cascade.cascadeToOne(Cascade.java:398) at org.hibernate.engine.internal.Cascade.cascadeAssociation(Cascade.java:323) at org.hibernate.engine.internal.Cascade.cascadeProperty(Cascade.java:162)
