

EDIT - bug #7857

Update name relationship type representations and symmetry

10/23/2018 11:30 PM - Andreas Müller

Status:	Closed	Start date:	
Priority:	Highest	Due date:	
Assignee:	Andreas Müller	% Done:	100%
Category:	cdm	Estimated time:	0:00 hour
Target version:	CDM UML 5.5	Found in Version:	
Severity:	normal		
Description			
since #7809 it is now possible to store name relationships in both directions.			
Many of the direct representations are missing an "is xxx". This is necessary to better distinguish from "has xxx" relations.			
Also we need to adapt symmetry. 4 name relationships are defined as symmetrical (misspelling for, orth. var. for, emendation and nom. alt.). Generally none of the name relationships is really symmetrical. Even alternative names do have a kind of preferred name even if the alternative name is not illegitimate.			
We should set all these "symmetric" flags to false.
