Description			
There is an uncertainty in many old and new publications, for example only mm.yyyy or Autumn YY given, this can be handled easily by a time span.			
Currently no data are entered, if they are not precise.

- Target version changed from Unassigned CDM tickets to Release 5.5

In the GatheringEvent the gatheringDate setter and getters only operate with Partial but the gatheringDate value is transformed into a timeperiod which is stored in the base class EventBus:

```
public void setGatheringDate(Partial gatheringDate){
    this.setTimeperiod(TimePeriod.NewInstance(gatheringDate));
}

public void setGatheringDate(Calendar gatheringDate){
    this.setTimeperiod(TimePeriod.NewInstance(gatheringDate));
}
```

It would make sense to allow using timeperiod for gatheringDate in general.

For the TypeSpecimenEditor we will use the timeperiod field instead of gatheringDate

- *Status changed from Resolved to Closed*
- *Assignee changed from Wolf-Henning Kusber to Andreas Kohlbecker*
- *% Done changed from 50 to 100*

Time span implemented as wished.

The data format might be reformatted
Currently (German style): 1.1.2000-2.2.2010
This would be a different ticket.
