This error can not be reproduced by saving a variety taxon name with blank genus. So the problem that causes the exception to be raced must have been caused by something else. Most probably this has something to do with an un-clean session.

- Is duplicate of bug #8161: *FilterablePagingProvider classes as transactional readonly spring beans added

#13 - 03/05/2019 11:21 AM - Andreas Kohlbecker

- Status changed from New to Rejected

the *FilterablePagingProviders only are using service methods which are anyway annotated with @Transactional(readOnly=true), therefore it makes not much sense managing transactions in the *FilterablePagingProvider classes. - rejecting ticket
