fix #7979 DateTimeJSONValueProcessor returns null for null

History

#1 - 01/11/2019 06:08 PM - Wolf-Henning Kusber

- Subject changed from *Registration time, display* to *Registration date and time, display*
- Priority changed from *New* to *Highest*

Corrected description: Test and Production portal:

Registration date and registration time displays the system time of the user's computer.
Observation: between 2019-01-11 17:36:56 and 2019-01-11 17:39:01

Registration on 2019-01-11 17:36:56 in
F5
Registration on 2019-01-11 17:39:01 in

Solution: get date of registration (and time) as stored in the CDM database.

#2 - 01/15/2019 01:05 PM - Andreas Kohlbecker

- Status changed from *New* to *In Progress*

This happens always when the Registration.registrationDate is null. The date should also be null in the json response but the DateTimeJSONValueProcessor produces *now* in case of null.

#3 - 01/15/2019 01:13 PM - Andreas Kohlbecker

- Status changed from *In Progress* to *Resolved*
- % Done changed from 0 to 50

- % Done changed from 50 to 100

Test portal and Release Portal (checked 2019-04-12):
Displayed dates are correct.

Registrations made in Vaadin are displayed correctly as datetime, such as:
Registration on 2018-07-12 18:31:51

Variant 1 (not many registrations) Registration made in TaxEditor:
Registration on 2018-06-08 00:00:00 in PhycoBank Berlin
This is acceptable

Variant 2 (c. 1000 registration) Registrations made 1998/1999 by IAPT:
Registration on 1998-03-13 00:00:00 in Berlin
This is acceptable
