To be discussed concatenation: "&" not perfect, any better solution?

Do we need a subheadline in case of old names/designations?

Review:

Example <http://phycobank.org/100005>

Event: New name & new taxon & new nomenclatural type

Issue 1: nomenclatural type -> nomenclatural type

Issue 2: Sorry, I changed my mind, I would like to see another layout:

Event: new name, new taxon, new nomenclatural type

We might begin with a small letter following the colon

Instead of "space&space" I'd like to see "nospace,space"

Registration Id: <http://phycobank.org/100005>

Event: ¹New name, ²& new taxon, ³& new nomenclatural type

Example: <http://phycobank.org/100298>

Issue 3: placement of subheadline below the name

Issue 4: for alle new combinations (with basionym or with replaced synonym) please omit "new taxon"

This term "new taxon" is in line with the concept of taxonyms/potential taxa in the sense of Berlin Model and CDM but for normal users it is just a new combination for an already known taxon.

Wording is fine :)

Remaining issue: subheadline is not between identifier and name, but displaced within a nomenclatural act (see arrow in second screen shot)

Id: <http://phycobank.org/100110> (new combination AND validation)

<http://phycobank.org/100116> (new name)

Displaced in new genus, new combination with basionym
