#6 - 09/17/2019 02:17 PM - Katja Luther

- Status changed from New to Resolved
- Assignee changed from Katja Luther to Patrick Plitzner

this is fixed. please review.

For review you should open a reference selection dialog and choose a journal.
In a second selection you should select any other type of reference

Then go to another reference of type article and open the inreference selection dialog and then only the last selected journal should be displayed in the preselected list of references.

#7 - 09/17/2019 02:59 PM - Katja Luther

- % Done changed from 0 to 50

#8 - 09/18/2019 03:33 PM - Patrick Plitzner

- File picture417-1.png added
- Status changed from Resolved to Feedback
- Assignee changed from Patrick Plitzner to Katja Luther

I am not sure if I tested this correctly. Here is what I did:

1. I selected a Generic reference as secundum for one taxon.
2. Then I hit "Edit" on that reference and it proposed the reference itself when trying to add an inReference (see Screenshot)

Edit Reference + x onf_am

Reference

The Reference is referenced by 2 objects, if you change it, it is changed for all these objects

#9 - 09/18/2019 03:35 PM - Katja Luther

the reference needs to be an article because therefore an inreference type exist

#10 - 09/18/2019 03:38 PM - Patrick Plitzner

Another thing I tested:

1. I imported a specimen via ABCD import which had the generic reference "DNA_Bank"
2. I tried to select an existing book reference (checked in bulk editor before) which did not show in the selection dialog.
3. I deleted the import reference
4. Then the book showed up.

This feels very unintuitive. I only realized that deleting could help because I knew of this ticket and supposed that the book is probably filtered because it was not of the type of current reference (generic).

#11 - 09/18/2019 03:42 PM - Patrick Plitzner

ok, I tested the recently selected references with Article and Journal as InReference which works fine. Nevertheless the issue mentioned in [#8034#note-10](#) feels strange. But we may move this to the next milestone

#12 - 09/18/2019 04:53 PM - Katja Luther

Did you selected the book in a selection dialog or only in bulk editor? The recently selected references are only for selection dialogs

#13 - 09/18/2019 04:53 PM - Katja Luther

- Assignee changed from Katja Luther to Patrick Plitzner

#14 - 09/18/2019 05:11 PM - Patrick Plitzner

- Assignee changed from Patrick Plitzner to Katja Luther

Did you selected the book in a selection dialog or only in bulk editor? The recently selected references are only for selection dialogs

No, sorry, maybe I wrote this too confusing. I just wanted to say that I had a look at all references in the bulk editor to see which are available and should be shown.

I only edited in the details view for the taxon.

#15 - 09/18/2019 05:26 PM - Patrick Plitzner

Hmm, now when I already have a reference for the secundum, the selection dialog only shows some of the last used references but does find any other references when entering '?' or any letter

#16 - 09/18/2019 05:51 PM - Katja Luther

Patrick Plitzner wrote:

this should be fixed.

#17 - 09/18/2019 05:56 PM - Katja Luther

- Status changed from Feedback to Resolved

fix is committed, please review.

#18 - 09/18/2019 05:57 PM - Katja Luther

- Assignee changed from Katja Luther to Patrick Plitzner

#19 - 09/19/2019 01:28 PM - Patrick Plitzner

- Status changed from Resolved to Closed

- Assignee changed from Patrick Plitzner to Katja Luther

- % Done changed from 50 to 100

works fine

#20 - 04/20/2020 03:01 PM - Andreas Müller

- Related to bug #8961: Using the selection dialog for nomenclatural references removes the recently used list added
