EDIT - feature request #8095

feature request # 8086 (New): registration submission endpoint implemented

response model for registration submission webservice

02/12/2019 01:57 PM - Andreas Kohlbecker

Status:	New		**Start date:**	
Priority:	Priority13		**Due date:**	
Assignee:	Andreas Kohlbecker		**% Done:**	0%
Category:	cdmlib-remote		**Estimated time:**	0:00 hour
Target version:	Reviewed Next Major Release			
Severity:	normal			

Description

web service URLs:

```
POST: /registration/
PUT: /registration/{phycobankID-urlencoded}
```

The submission data schema is being discussed in #8085

Upon submission the service will respond with one of the following options:

1. A HTTP error code (400) and the response object with a detailed error message in case the submitted data was causing a problem in the phycobank system.
2. Response object which also trans ports the preliminary persistent identifier (http://phycobank.org/{integer}) for the nomenclatural act. The identifier is not made public at this point.

Model (work in progress) by example

```
{
    "errors": [
        "error message 1",
        "error message 2",
     ],
    "identifier": "http://phycobank.org/999999"
    "status": "PREPARATION"
}
```
