

EDIT - task #8109

Concept for linking from taxon entries to name pages

02/19/2019 09:29 AM - Andreas Kohlbecker

Status:	New	Start date:	
Priority:	Priority14	Due date:	
Assignee:	Andreas Kohlbecker	% Done:	0%
Category:	cdm-dataportal	Estimated time:	0:00 hour
Target version:	Release 5.46		
Severity:	normal		
Description			
Taxon entries in the data portal do not allow to navigate to the according name page.			
This will become important once #8108 is implemented.			
A suggestion made in the context of #8108 is to replace the protologue link at the taxon entries by a link to the name page. the name page will show, link to the protologue.			
Alternatively could the whole name string be made a link to the name page, but this makes the page appearance more busy.			
It seems a good idea to implement the configurability of the linking into the name render templates.

- Related to feature request #8108: Name page shows complete name information (I) added

#2 - 02/19/2019 10:27 AM - Andreas Müller

most important will be that it is configurable per project how and where all the different information is shown.
