Not sure what this is really about except for the case issues handled in [#9263](#).

Possible issues could be:

- Some labels in NameTypeDesignationsStatus use abbreviations such as "orig. des.". But as we want to have also the very short abbreviations this seems to be ok.
- Some abbreviations do are unconventional, but as they are not really in use this does not seem to matter.

When ever a real problem arises with the type designation status representations we can still update them accordingly. So I close the ticket for now.
