

## EDIT - task #8130

### Check if related feature data is cleared when supported facts type is changed

02/22/2019 01:16 PM - Patrick Plitzner

<b>Status:</b>	In Progress	<b>Start date:</b>	
<b>Priority:</b>	Highest	<b>Due date:</b>	
<b>Assignee:</b>	Katja Luther	<b>% Done:</b>	0%
<b>Category:</b>	taxeditor	<b>Estimated time:</b>	0:00 hour
<b>Target version:</b>	Release 5.46		
<b>Severity:</b>	normal		
<b>Description</b>			
For example:			
<ol style="list-style-type: none"><li>1. Set a feature to support quantitative data and assign recommended measurement units, statistical measures and recommended modifiers.</li><li>2. Change the feature to not support quantitative data</li><li>3. Check if the recommended measurement units, statistical measures and recommended modifiers are removed from the term.</li></ol>			
Update:			
It is <b>not</b> removed when doing this.

We may want to implement hard or soft validation for this. Maybe also an update script to remove existing data (if it exists).

@Andreas: Should we convert this into a cdm ticket? This would best be done on model level, wouldn't it?

Katja, could you please check how we do these "model validations" in terms of e.g. nomenclatural code changes in TaxonName. I think there is also at least 1 more place where we do this. We should define a common strategy how to handle these in UIs. Additionally we should define (soft?) validations to avoid persisting such unwanted states.

**#8 - 03/12/2019 08:11 AM - Katja Luther**

For nomenclatural code there is a method `checkForDeletableParts()` where the deletable parts set to null.

But for ranks the parts are kept but not shown any more. We should discuss if this is wanted behaviour.

I guess this is not yet fixed.

**#17 - 03/05/2020 11:39 AM - Andreas Müller**

can you please check and set the correct status for the ticket?

I think the status should be In process and we should discuss how it should be handled in general because it should be handled the same way everywhere.
