<b>Description</b>	
Turning the TaxonNameStringFilterablePagingProvider into a readonly service bean should solve the cascade="all-delete-orphan" problems mentioned in <a href="#">#8075</a> . It would make a lot of sense to turn all the *FilterablePagingProvider classes into transactional readonly spring beans.  As prototype beans?

- Status changed from *New* to *Rejected*

- Target version deleted (Release 5.6)

the \*FilterablePagingProviders only are using service methods which are anyway annotated with @Transactional(readOnly=true), therefore it makes not much sense managing transactions in the \*FilterablePagingProvider classes. - rejecting ticket
