#3 - 05/05/2019 11:29 AM - Andreas Müller

- Target version changed from CDM UML 5.5 to CDM UML 5.15

#4 - 07/25/2019 10:16 AM - Andreas Kohlbecker

- Copied to task #8405: Adapt cdm-vaadin to term structure changes added

#5 - 07/25/2019 11:10 PM - Andreas Müller

- Priority changed from New to Highest

- Target version changed from CDM UML 5.15 to Release 5.9

Are there any changes needed? Currently it looks like most things work (except maybe for the Specimen page, is this caused by the changes?).

#6 - 07/26/2019 08:53 AM - Andreas Kohlbecker

- Status changed from New to Worksforme

The Specimens pages already are broken in the Production portal, so this has nothing to do with the term structure changes.

I think that there are no changes required in the portal to adapt it to the changes-

#7 - 07/26/2019 09:27 AM - Andreas Kohlbecker

- *Status changed from Workforme to New*

I am reopening this issue since the data portal code even if being fully functional might need to be adapted to the modified naming of classes, etc.:

- FeatureTree -> TermTree

#8 - 07/26/2019 11:07 AM - Andreas Müller

Yes, we should at least do a string search for "FeatureTree". Also a string search on "FeatureNode".

#9 - 07/26/2019 11:16 AM - Andreas Kohlbecker

- *Copied to deleted (task #8405: Adapt cdm-vaadin to term structure changes)*

#10 - 08/02/2019 11:55 AM - Andreas Kohlbecker

- *Status changed from New to Resolved*

- *% Done changed from 0 to 50*

check taxon profile settings in a couple of test portals:

- Cichorieae
- Corvidea
- Palmweb
- Cyprus

#11 - 08/12/2019 05:08 PM - Andreas Kohlbecker

- *Status changed from Resolved to Closed*

- *% Done changed from 50 to 100*

profile settings are working in the above test portals (palmweb has not been tested, since there is no cdm test instance running)
