EDIT - feature request #8181

Further features for bulk editors

03/15/2019 11:44 AM - Katja Luther

Status:	New	**Start date:**	
Priority:	Priority14	**Due date:**	
Assignee:	Katja Luther	**% Done:**	0%
Category:	taxeditor	**Estimated time:**	0:00 hour
Target version:	Release 5.46		
Severity:	normal		

Description

this is a ticket to collect all wanted features for bulkeditors:

Advanced search or column filter options:

- ref type (request by Henning) - column exists already
- created by (request by Henning) --> #8968
- MarkerType (suggestion by Andreas K)

Just a thought on additinal filter options for bulkeditors in general:

the service method IdentifiableDaoBase.findByTitleWithRestrictions(..) provides a very flexible means to filter cdm entitiy by offering a generic way to apply multiple filter parameters. If we would use this find method for all Bulkeditors it would be possible to offer a UI tool to build and combine filter options, conceptionally maybe similar to this

#5 - 06/17/2020 07:09 PM - Andreas Müller

- Description updated

- Target version changed from Unassigned CDM tickets to Release 5.18

ref type already exists so I kind of remove it from the above list.

As "created by" should be easy to implement so I set target version to 5.16.
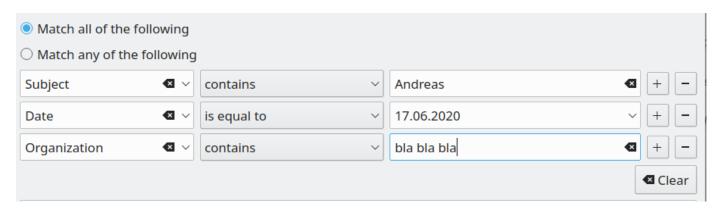

@Andreas: can you explain what you mean by MarkerType? Should there be a concatenated list of marker type labels with :true or :false behind each label? What is the usecase you need it for.

I agree. An advanced search which allows explicit searching for bulk editor entities is definitely something we need urgently. This is a known issue. But I would move this comment to a new(?) ticket on advanced bulk editor search. This one is primarily on table columns which is related but not the same.

@Katja: do you know if such a ticket exists already?

I was meaning markers which is would be a filter which allows combining MarkerType with a boolean value as you pointed out correctly

I don't think so. The focus of this ticket doesn't seem to be defined precisely yet. Aren't we in the middle of figuring it out?

Upps, sorry, as we had a ticket recently which was only about new columns I thought this ticket is also about new columns only.
But you are right that it is more general.

However, a new advanced search interface may take some time and discussion to implement.
A simple filter may be fast. We already have something similar for the distribution editor.

@Katja: is it difficult to add such a filter row to the bulk editors as well?
