

EDIT - bug #8192

The curator must be able to unlock a published registration for edition

03/21/2019 06:32 PM - Andreas Kohlbecker

Status:	Closed	Start date:	
Priority:	Highest	Due date:	
Assignee:	Andreas Kohlbecker	% Done:	100%
Category:	cdm-vaadin	Estimated time:	0:00 hour
Target version:	Release 5.6	Found in Version:	
Severity:	critical		
Description			
The curator sometimes needs to modify the data for a registration after it has been published.			
Currently it is required to set the registration to another status than published, edit the data and restore the published status. When doing this the registration date is updated, though.			
To avoid the registration date to be changed when the curator needs to make modifications we agreed on providing a button for curators by which the registration can be "unlocked" even if it is published or "rejected".

- Assignee changed from Wolf-Henning Kusber to Andreas Kohlbecker

- % Done changed from 50 to 90

Checked in Test-System with two names of Nupela, registered 2018-11-02.

TypeSpecimen: unlock and add a type: works

TypeSpecimen: add locality: works

TypeSpecimen: correct accession number: works

TypeSpecimen: add field number: works

TypeSpecimen: add Geo reference: works

Name: correct epithet: works

Name: add incorrect name: works

Name: correct or add reference detail: works

In all cases the original registration date was kept, as agreed.

These are examples which occur in real life.

Question: are the changes tracked in the system (changed content, updated who, when)?

The critical point is the correction of the epithet (needed if it turns out, that a name published was incorrect in terms of orthography).

Once the nomenclatural status can be added, this will be a major issue for later corrections, e.g. change status from [NULL] to inval. or illeg. This should be tested.

Please check the last lines. If there are no doubts, this ticket can be set to 100% and to closed.
