

EDIT - bug #8203

Adapt specimen page title to record basis

Description

The current specimen page has "Specimen" written in the title despite the actual record basis

Example: http://portal.cybertaxonomy.org/flora-greece/cdm_dataportal/specimen/cdaa6948-1f7c-4644-8ebb-252f2a5434dd (here it should be "Observation")
