Target version:	Release 5.45			
Severity:	normal		**Found in Version:**	

Description

Permanent bug:
Image Reference is selected for the first time -> selected but not gets lost when clicking in another field.
Image Reference is selected for the second time -> selected but mersists when clicking in another field.

Solutions:
(1) Mouse over: Please select the reference 2 times, otherwise it will be not saved (not preferred)
(2) Fix the bug (preferred)

#4 - 04/26/2019 03:18 PM - Andreas Kohlbecker

- Subject changed from TypeDesignationsEditor: Newly selected image Reference in TypeSpecimens is not saved to SpecimenTypeDesignationsEditor: Fist selection of mediaReference gets lost

- Description updated

This is a tough nut to crack, since this appens only for the mediaReference field.

There is no obvious difference to the collection field in the same row of the type designations list editor.

The pobelms comes from that the value is not being set after selecting a reference. At the time when the value change listeners are triggered the value of the nested select is still null.

#5 - 04/26/2019 03:30 PM - Andreas Kohlbecker

- Priority changed from Highest to Priority14

This problem could disappear when turning the list editor in to a data grid as planned anyway.

#6 - 04/26/2019 05:29 PM - Wolf-Henning Kusber

When I copy the reference detail into the respective field, I can select the reference and save it. Than the reference detail is lost, but I copy it again.
Do not know if this workaround helps in solving this problem.

#7 - 05/03/2019 02:59 PM - Andreas Müller

- Target version changed from Release 5.7 to Release 5.8
