ref #8252 preserving section authors and better title compentation

#### History

##### #1 - 04/30/2019 03:13 PM - Andreas Kohlbecker

- Subject changed from *Journal titles in dropdown list truncated* to *reference ellypsis must not be applied to all reference types*
- Priority changed from *New* to *Highest*
- Target version changed from *Unassigned CDM tickets* to *Release 5.7*

I think the same accounts for book series etc.

the reference title cache ellypsis must not be applied to all reference types.

Which types need to be excluded?

##### #2 - 04/30/2019 03:22 PM - Wolf-Henning Kusber

reference title cache ellypsis must not be applied to:

Book series  
Journal  
Proceedings

i.e. all standardised invariable entries selected by many references/items.

##### #3 - 04/30/2019 07:53 PM - Andreas Kohlbecker

- Status changed from *New* to *Resolved*
- Assignee changed from *Andreas Kohlbecker* to *Wolf-Henning Kusber*

- % Done changed from 0 to 50

done! please review.

**#4 - 04/30/2019 09:05 PM - Wolf-Henning Kusber**

- Assignee changed from Wolf-Henning Kusber to Andreas Kohlbecker

All Titles are given fully up to a length of approx. 60 characters.

This is okay (i) because the the title can be identified, (ii) the full title can be checked by clicking the edit button.

Example:

Abhandlungen der Naturhistorischen Gesellschaft zu Nürnberg

fully given

Mémoires du Muséum National d'Histoire Naturell, Nouvelle ...

truncated, full title is:

Mémoires du Muséum National d'Histoire Naturell, Nouvelle Série, Série B, Botanique

I can live with this.

Further issues:

Proceedings can not tested because of lacking data (ToDo WHK)

Series include Series and Jounals (This should be checked and tested by WHK)

I propose to set this ticket to 100% and close it, agreed?

**#5 - 04/30/2019 11:12 PM - Andreas Kohlbecker**

- Status changed from Resolved to Feedback

- Assignee changed from Andreas Kohlbecker to Wolf-Henning Kusber

All Titles are given fully up to a length of approx. 60 characters.

This is okay (i) because the the title can be identified, (ii) the full title can be checked by clicking the edit button.

It is also possible to skip the ellipsis completely in this case some titles could exceed the given space, though.

What is the best solution from the user perspective?

**#6 - 05/01/2019 07:24 PM - Wolf-Henning Kusber**

- Assignee changed from Wolf-Henning Kusber to Andreas Kohlbecker

"It is also possible to skip the ellipsis completely in this case some titles could exceed the given space, though.

What is the best solution from the user perspective?"

In the following case:

Mémoires du Muséum National d'Histoire Naturell, Nouvelle ...

truncated, full title is:

Mémoires du Muséum National d'Histoire Naturell, Nouvelle Série, Série B, Botanique

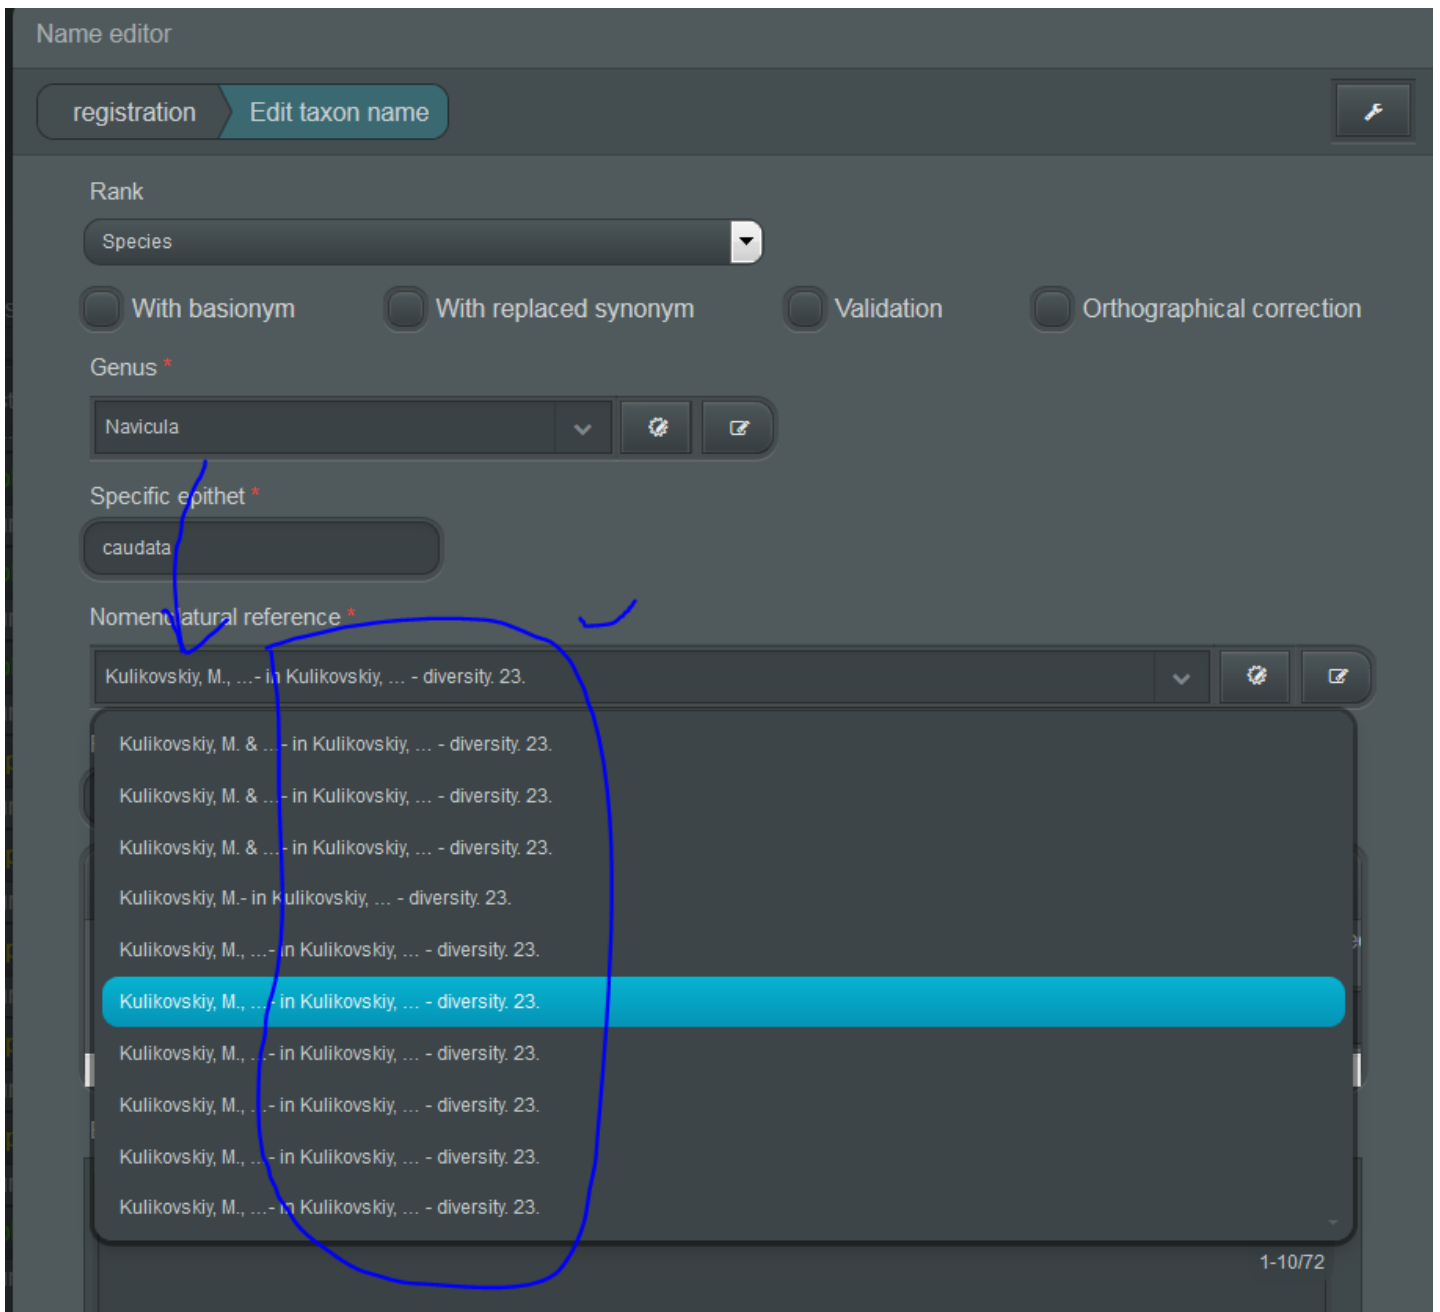

it could be that an informative (=distinctive) part comes after the ellipsis. So to be on the safe side it would be better to skip the ellipsis completely for the given Reference types.

**#7 - 05/03/2019 10:36 AM - Andreas Kohlbecker**

- Related to task #8209: use ellypsed references for all reference comboboxes added

**#8 - 05/07/2019 06:16 PM - Wolf-Henning Kusber**

- File picture017-1.png added

Ellipsis must not be applied to in-authors/nomenclatural author team.

Example:

How to correct

Kulikowski, Metzeltin & Lange-Bert.

to

Kulikowski, Lange-Bert. & Metzeltin ? See screen shot.

(Reference itself is okay)

**#9 - 05/16/2019 01:33 PM - Andreas Kohlbecker**

- Assignee changed from Andreas Kohlbecker to Wolf-Henning Kusber

Wolf-Henning Kusber wrote:

Ellipsis must not be applied to in-authors/nomenclatural author team.

Example:

How to correct

Kulikowski, Metzeltin & Lange-Bert.

to

Kulikowski, Lange-Bert. & Metzeltin ? See screen shot.

(Reference itself is okay)

This means implementing the rule that the ellipsis must not be applied to sections having an article as inReference. But what if the list of authors is quite long? I am thinking of cases with ~10 authors in the team. In this case the the text line shown in the combobox would be quite/too long again.

#### **#10 - 05/16/2019 03:07 PM - Wolf-Henning Kusber**

- Assignee changed from Wolf-Henning Kusber to Andreas Kohlbecker

For a pragmatic approach (as of 16 May 2019):

Currently: only 20% authors can be recognized. That means that each needed section author team is newly established and produces duplicats or multiple entries.

If 20% of author teams have one author, 20% = two authors, 20% = three authors, 20% = four authors, 20% >=five authors:

I need the correct author team, i.e. if nomenclatural authors are section authors, I need these, if nomenclatural authors are identical to bibliographic authors, I need those (but in the latter case, I can check the bibliographic reference)

If cut off after the second author = 40% of author teams can be recognized.

If cut off after the third author = 60% of author teams can be recognized.

If cut off after the fourth author = 80% of author teams can be recognized.

If no cut off = 100% of author teams can be recognized BUT the string is to long.

A pragmatic approach for users would be 80% (60% only if the developer has major problems)

#### **#11 - 05/17/2019 01:53 PM - Andreas Kohlbecker**

- Assignee changed from Andreas Kohlbecker to Wolf-Henning Kusber

Would using the acronyms or truncating the names of the section authors to acronyms be helpful?

e.g.:

- Kulikowsy M --> K. M.
- Lange-Bertalot Horst --> H. L-B.

#### **#12 - 05/17/2019 01:58 PM - Wolf-Henning Kusber**

not realy, people do not know alle given names.

How I could differentiat between D.M. (= Ditmar Metzeltin) and D.M. (= David Mann)?

But this opens also a new issue:

Why the bibliographic representation of nomenclatural authors is used?

#### **#13 - 05/21/2019 11:18 AM - Andreas Kohlbecker**

- Assignee changed from Wolf-Henning Kusber to Andreas Kohlbecker

#### **#14 - 05/21/2019 11:55 AM - Andreas Kohlbecker**

- Status changed from Feedback to In Progress

During a phone call today we decided to give the following solution a try:

1. The section author team will be truncated after the 4th author name
2. Other reference types should be ellipsed 'normally'

**IMPORTANT:** The nom. reference combobox is showing bibliographic authors instead of the nomenclatural variant - this needs to be fixed!

#### **#15 - 05/22/2019 08:49 AM - Andreas Kohlbecker**

- Status changed from In Progress to Resolved

- Assignee changed from Andreas Kohlbecker to Wolf-Henning Kusber

- % Done changed from 50 to 60

The improvement is implemented, please review once the test server is updated.

#### **#16 - 05/22/2019 06:08 PM - Wolf-Henning Kusber**

- File picture461-1.png added

- File picture461-2.png added

- File picture461-3.png added

- File picture461-4.png added
- Assignee changed from Wolf-Henning Kusber to Andreas Kohlbecker
- % Done changed from 60 to 80

Adlafia

Specific epithet \*

pseudobaicalensis

Nomenclatural reference \*

Abarca, N., Abbott, I.A., Abe, T. & al. - in Kulikovskiy, ... - diversity. 23.

Reference detail

37, pl. 95, fig. 1-8

six section nomenclatural authors  
 three authors "et al." displayed. This should be acceptable by users.  
 Authors are bibliographic (see above)

Curation

Name: Adlafia pseudobaicalensis N.Abarca, I.A.Abbott, T.Abe, Ács, Adachi & Afonso-Carr. Type: Russian Federation, Bolshoi

heba Ushkaniy Island, Lake Baikal, 20.7.1965, A. Skabitschewsky. Holotype, (IBIW 15655m); Isotype, (SZCZ 15655a). + <http://phycobd>

In the "Registration Workingset Editor" view the six nomenclatural authors are perfectly displayed.

Editorial notes

- A.C.
- Abarca, N.
- Abarca, N., Abbott, I.A., Abe, T. & al.
- Abbott, I.A.
- Abe, T.
- Abe, T. & Masuda, M.
- Abé, T.H.
- Ács, É.
- Ács, É., Wetzel, C.E. & Ector, L.
- Ács, É., Wetzel, C.E., Buczkó, K. & al.

Selection in the Reference Editor opening a section:  
three authors "et al." displayed. This should be acceptable by users.  
Authors are bibliographic (see above)

No issue: collector(s) in Specimen Typedesignation editor:

three authors "et al." displayed. This should be acceptable by users.

Authors are bibliographic (here this is perfect, because collectors can be bibliographic without being nomenclatural authors)

**#17 - 05/23/2019 07:42 AM - Andreas Kohlbecker**

Since there are no more obvious problems with reference ellipsis we can close this issue, agreed?

**#18 - 05/24/2019 04:14 PM - Andreas Kohlbecker**

- Assignee changed from Andreas Kohlbecker to Wolf-Henning Kusber

- % Done changed from 80 to 90

**#19 - 05/24/2019 07:10 PM - Wolf-Henning Kusber**

- Assignee changed from Wolf-Henning Kusber to Andreas Kohlbecker

- % Done changed from 90 to 100

Technically the problem is solved.

As far as we keep the "bibliographic authors" issue in mind, we can close this ticket.

**#20 - 06/04/2019 07:21 AM - Andreas Kohlbecker**

- Status changed from Resolved to Closed

The issue of bibliographic authors being displayed for the nomenclatural reference is also fixed now.

- Related to bug #8375: ReferenceEllypsisFormatter produces too long strings in specific cases added
