```

The problem was the handling of the selected taxonname in the factual data view. Now the factual data view ignores the selection if the input of the detailsview is a descriptionelementbase

- Status changed from *Resolved* to *Feedback*

- Assignee changed from *Andreas Müller* to *Katja Luther*

The endless loop does now not show up anymore.

But after closing the dialog the supplemental data view does not get the focus on the newly selected object. It still shows information on the old object.

this seems to be an older problem, testing on stable the newly selected element is not shown in the supplemental data view.

**#7 - 06/04/2019 11:04 AM - Katja Luther**

- *Target version changed from Release 5.8 to Release 5.7*

this issue is cherry-picked to hotfix5.7.3, therefore change the milestone to 5.7

**#8 - 03/17/2022 11:12 AM - Katja Luther**

- *Status changed from Feedback to Closed*

The selection issue is another problem, so I would close this ticket and create a new ticket for setting the correct selection for referencing objects and supplemental data view.
