Description

As discussed with Henning on Friday 2nd of August 2019, we decided for the following solution:

- the nomenclatural act needs to be shown clearly as such, e.g: surround by a box, maybe with colored background
- the citation of the reference should be placed right below, labeled with "published in:"
- followed by the map showing the gathering locations of type specimens
- in case of nomenclatural acts for existing names the name would follow the map
- as last element in the registration page comes the registration metadata like date and office
