EDIT - feature request #8503

Create abstract base UI from RegistrationUI and use it for all UIs

08/29/2019 03:08 PM - Andreas Kohlbecker

Status:	Closed	**Start date:**	
Priority:	New	**Due date:**	
Assignee:	Andreas Kohlbecker	**% Done:**	50%
Category:	cdm-vaadin	**Estimated time:**	0:00 hour
Target version:	Release 5.29		
Severity:	normal		

Description

The code which configures the error hanlder should also go into the abstract base class:

```
        DelegatingErrorHandler delegatingErrorHander = new DelegatingErrorHandler();
        WindowErrorHandler errorHandler = new WindowErrorHandler(this, RegistrationUIDefaults.
ERROR_CONTACT_MESSAGE_LINE + "</br></br>"
                +
"<i>To help analyzing the problem please describe your actions that lead to this error and provide
 the error details from below in your email. "
                + "You also might want to add a sreenshot of the browser page in error.</i>");
        delegatingErrorHander.registerHandler(new ErrorTypeErrorHandlerWrapper<
PermissionDeniedException>(PermissionDeniedException.class, new PermissionDeniedErrorHandler(this
)));
        delegatingErrorHander.registerHandler(new ErrorTypeErrorHandlerWrapper<Exception>(
Exception.class, errorHandler));
        setErrorHandler(delegatingErrorHander);
        VaadinSession.getCurrent().setErrorHandler(delegatingErrorHander);
```

also other code part of the init method

To be implemented for

- DistributionStatusUI **URGENT**: this UI is already based on the UI interface only
- StatusEditorUI: still based on the AbstractAuthenticatedUI
- ConceptRelationshipUI: still based on the AbstractAuthenticatedUI

Additional

- drop AbstractAuthenticatedUI and CdmBaseUI once done
