

EDIT - bug #8530

Multiple Representation Exceptions when editing Textual Type Designations

Target version:	Release 5.46	Found in Version:	
Severity:	normal		
Description			
there is again a multiple representation exception when editing nomenclatural reference and textual type designation.			
mail WB:			
Hallo, ich habe eine als Generic geparste Referenz in einen Artikel umgewandelt. Vorher hatte ich den ex-Autor geändert und Abgespeichert. Ich kann jetzt auch anschließend nicht mehr die eingegebenen Reference Details abspeichern (stimmt jetzt nicht mehr, nach dem 3. Speichern sind sie da). Es gibt aber einige zusätzliche Merkwürdigkeiten: Der bekannte Detail-Update Bug ist schlimmer geworden, eben habe ich ein Synonym ausgewählt und die Details blieben einfach beim Taxon stehen. Das Schließen der Media und Facts Views wird jetzt nicht nur beim Start des Editors ignoriert, sondern sie gehen auch wieder auf, wenn man ein neues Taxon aufruft. Ich mache mal den Editor auf und zu, mal sehen, ob das so bleibt.

Hallo, jetzt habe ich die nom. Referenz ergänzt, eventuell nicht abgespeichert, und anschließend einen Typus (Text) eingetragen:

Hallo,
und jetzt einfach nach Anfügen der nom. Referenz des Synonyms und speichern – der Name war offenbar noch nicht geparst.
Beim Taxonnamen wurde erst nach Wechsel zum Synonym und zurück geparst, dann ohne Problem abgespeichert .

Hallo,
der Fehler scheint bei einfachen nom. details nicht aufzutauchen, also wenn nur eine Seitenangabe vorliegt.

Alles war vorher abgespeichert. Nur existierenden Type-Text aufgemacht, Text hinzugefügt, gespeichert.

mail Inan Erdogan:

ich glaube das passiert bei mir fast ausschliesslich, wenn ich entweder im Hauptansichtsfeld den Synonymen ergänzende (zB Publikations-)daten hinzufüge, und bei der Eingabe von Typusinformationen in den Details.

Die Fehlermeldung habe ich seit heute (seit 12:00 Uhr vier oder fünf mal) allerdings unregelmäßig und nicht reproduzierbar.
