Common Names => Common Name Languages (and/or, if it's too long change the label of the page to "Common Name Languages")

what exactly has been done here, both labels are still "Common Names" in language and in factual data, but should be Common Name Languages and Common Name Areas. Also the label of the page should be changed accordingly

**#18 - 03/09/2020 04:55 PM - Andreas Müller**

upps, sorry, looks like I was not up-to-date. Now I see what you changed. Only open issue, could you rename "Areas for Common Names" to "Common Name Areas". This is more consistent with "Common Name Languages" and shorter.

**#19 - 03/09/2020 05:01 PM - Katja Luther**

- Status changed from Feedback to Resolved

Applied in changeset [taxeditor|ecdbb425f7a58d2d969aaace4f3f47874e0e4fbf](#).

**#20 - 03/09/2020 05:07 PM - Andreas Müller**

- Status changed from Resolved to Feedback

The general io page should contain the „Show Export/Import Menu“ of the actual „General“ page.-> this preference should also be cloned to UI/Navigator

The last issue "this preference should also be cloned to UI/Navigator" seems not to be implemented yet

**#21 - 03/09/2020 05:32 PM - Andreas Müller**

on local pref distribution status page the selection button is not disabled if db pref does not allow override.

>for the default pref it should be visible whether override is allowed or not

The Label "Actual status selection, the area specific selection is only available for serverside preferences" is a bit strange. What is meant with "Actual status selection"?

Also in the second line 'please remove "general" by "default" in both labels the one for enabled default and the one for disabled default.

**#22 - 03/09/2020 05:34 PM - Andreas Müller**

- Description updated

**#23 - 03/09/2020 05:38 PM - Andreas Müller**

Also in the second line 'please remove "general" by "default" in both labels the one for enabled default and the one for disabled default.

The label should say that this is the list of different preferences for area specific status selections, but locally only the default status selection without area specification can be changed.

The change general -> default should be available now.

This is done.

I don't understand why we need an extra submenu for this single issue. Can't we handle it directly on the UI->Taxon Navigator page?

**#27 - 03/21/2020 01:29 PM - Andreas Müller**

- % Done changed from 50 to 70

The label should say that this is the list of different preferences for area specific status selections, but locally only the default status selection without area specification can be changed.

Yes, but this does not become clear (at least for me). What about a text like:

"The below table shows the available distributions status lists for all areas (default) and for specific areas as defined in the database wide preferences. Here in the your local preference only the default list can be overridden by using the below button."
