EDIT - bug #8582

Taxon Navigator: Classification label not refreshed & new taxa not visible

10/10/2019 05:49 PM - Andreas Kohlbecker

Status:	Closed		**Start date:**	
Priority:	New		**Due date:**	
Assignee:	Katja Luther		**% Done:**	70%
Category:	taxeditor		**Estimated time:**	0:00 hour
Target version:	Release 5.11			
Severity:	normal		**Found in Version:**	

Description

1. The Classification label is not refreshed in the Taxon Navigator after changing it in the "Classification Wizzard" - **DONE**
2. After adding a new taxon to an empty classification, the classification still appears empty in the navigator. - **DONE**
3. The TaxonNavigator is not being refreshed after importing an ABCD file, newly created classifications are not visible unless the navigator view is closed and re-opened. => #8659

Choosing the Refresh function via the context menu does not help.

The view needs to be closed and reopened to make the changes visible.

I think this issue should have higher priority as this edit step is one of the first tasks in the Manual-EDIT-Platform-03-TaxEditor-Intro. Users should not be confused by such early problems in the suggested workflow.

- Related to bug #8631: ABCD import fails to put new taxa into the classification, create mediaspecimens, etc added

#9 - 11/06/2019 09:27 AM - Andreas Kohlbecker

- Description updated

- Status changed from Closed to In Progress

- % Done changed from 100 to 70

There is still a problem related to this issue.

The TaxonNavigator is not being refreshed after importing an ABCD file, newly created classifications are not visible unless the navigator view is closed and re-opened.

As this is not part of this ticket but related I created a new ticket: [#8659](#), otherwise we have to wait for release
