Target version:	Release 5.16			
Severity:	normal			

Description

After creating a new factual data entry (DescriptionElement) in the Factual Data View the new entry should be activated so that the *Details-View* is ready for data entry. Currently it is required to

1. Toggle the feature Set open
2. Select the new entry

I only found #8949, but this ticket is about the focus in details view.

I only found [#8949](#), but this ticket is about the focus in details view.

The first part of [#8949](#) is a duplicate for this ([#8585](#)) ticket, I guess, as it says "Open new fact in factual data view". Only the second part is about setting the focus in the details view. Maybe we should reduce [#8949](#) to be only about setting the focus in details view.
