Description			
Create a description detail page like it already exists for e.g. specimens.			
From additivity wiki:			
Wir brauchen eine Portal-Detailseite für Descriptions			
<ul style="list-style-type: none">• Von der Taxonseite gibt es einen Link unterhalb der Aggr. Description, der zu einer Seite mit einer Liste aller Quellen zeigt• Die Quellen sind die geklonten SpecimenDescriptions, die man einzeln anklicken kann.• Auf der Taxonseite sollen schon Daten erscheinen, so wie jetzt schon für das Feature Description• Quellenlink zu den SpecimenDescription soll nicht der TitleCache der Description sein, sondern gekürzt z.B. das SpecimenLabel (Collection+AccNo)• Geklonte SpecimenDescription brauchen Datum und Dataset im Titel• Keine langen Zeilen als Link, sondern Text in schwarz und dahinter ein Link Icon• Categorical Data soll mit Count angezeigt werden.

It is hard to review this ticket since the requirements to the layout of the page are missing in the ticket. Please add the full specification as discussed in the project (Meeting notes etc....)

There are still many open issues (most of them discussed in additivity). So we need a follow up ticket. This ticket as implement for 5.11 seems to be more about the existence of the page (and maybe correct URL syntax etc.). Layout (and ordering) definitely needs further work.

@PP: Maybe it is a no.brainer to remove the full description from each source again (as discussed in last meeting), this may make the page look much nicer already

Code review notes:

- description.inc#1179 : \$enclosing_tag = cdm_feature_block_element_tag_name(\$feature_block_settings); is unused, this breaks the feature block setting as_list (old bug)
- pages.inc : render_cdm_description_link() & compose_cdm_description() must not use <i> and
 to apply styling, all styling must be allied through css

These findings are not critical and should be solved for the next release.
