

EDIT - bug #8604

Key Editor View: Details for key missing when key is empty

10/18/2019 03:54 PM - Andreas Kohlbecker

Status:	New	Start date:	
Priority:	New	Due date:	
Assignee:	Katja Luther	% Done:	0%
Category:	taxeditor	Estimated time:	0:00 hour
Target version:	Unassigned CDM tickets	Found in Version:	
Severity:	normal		
Description As long as there are no entries in the key the details view is just blank. Instead the properties for the key itself should be shown so that it is possible to edit the label and scopes.

Not sure if this is easy to solve. I had discussions on it with Cherian already. As PKs without node are very rare in reality it is not a serious issue. More serious is #8569 as there is no workaround available.

If this ticket is difficult to solve we could have a workaround showing in details view that a PK node is required to edit details. Alternatively we could have a dialog similar to taxon node dialog to edit PK details even if no node exists.

Isn't it possible to add a FocusListener to the PolytomousKey table like viewer.getControl().addFocusListener(e -> { /* do the right thing*/ }) so that when table is focused while being still blank the details view can show the key?
