

EDIT - bug #8614

TermEditor: details view does not follow the active term after save

10/24/2019 12:49 PM - Andreas Kohlbecker

Status:	New	Start date:	
Priority:	New	Due date:	
Assignee:	Katja Luther	% Done:	0%
Category:	taxeditor	Estimated time:	0:00 hour
Target version:	Unassigned CDM tickets	Found in Version:	Release 5.10
Severity:	normal		

Description

To reproduce:

- Add new Feature term
- select the new term and modify it in the details view: e.g.: select Supports Quantitative Data, and then recommended measurement unit and statistical measures
- focus on another term
- **NOW Save** by ctrl + s
- set the Focus back onto the new term -> the details view still shows the wrong term, you need to activate another term first and then back to the term in question to see its data

History
