

EDIT - bug #8615

Distribution Editor: only available if enabled in local preferences

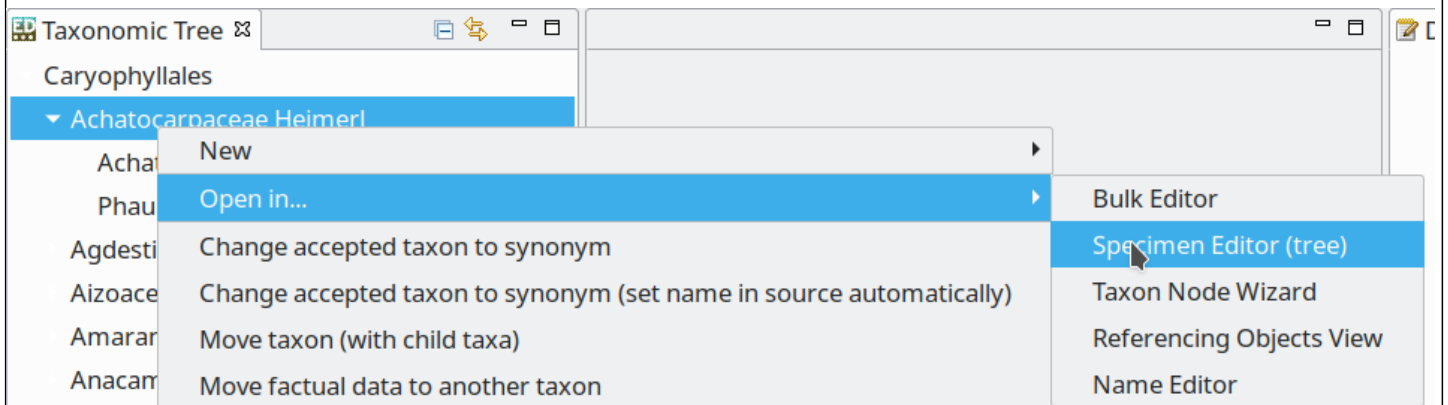

10/24/2019 01:58 PM - Andreas Kohlbecker

Status:	New	Start date:	
Priority:	New	Due date:	
Assignee:	Katja Luther	% Done:	0%
Category:	taxeditor	Estimated time:	0:00 hour
Target version:	Unassigned CDM tickets	Found in Version:	
Severity:	normal		

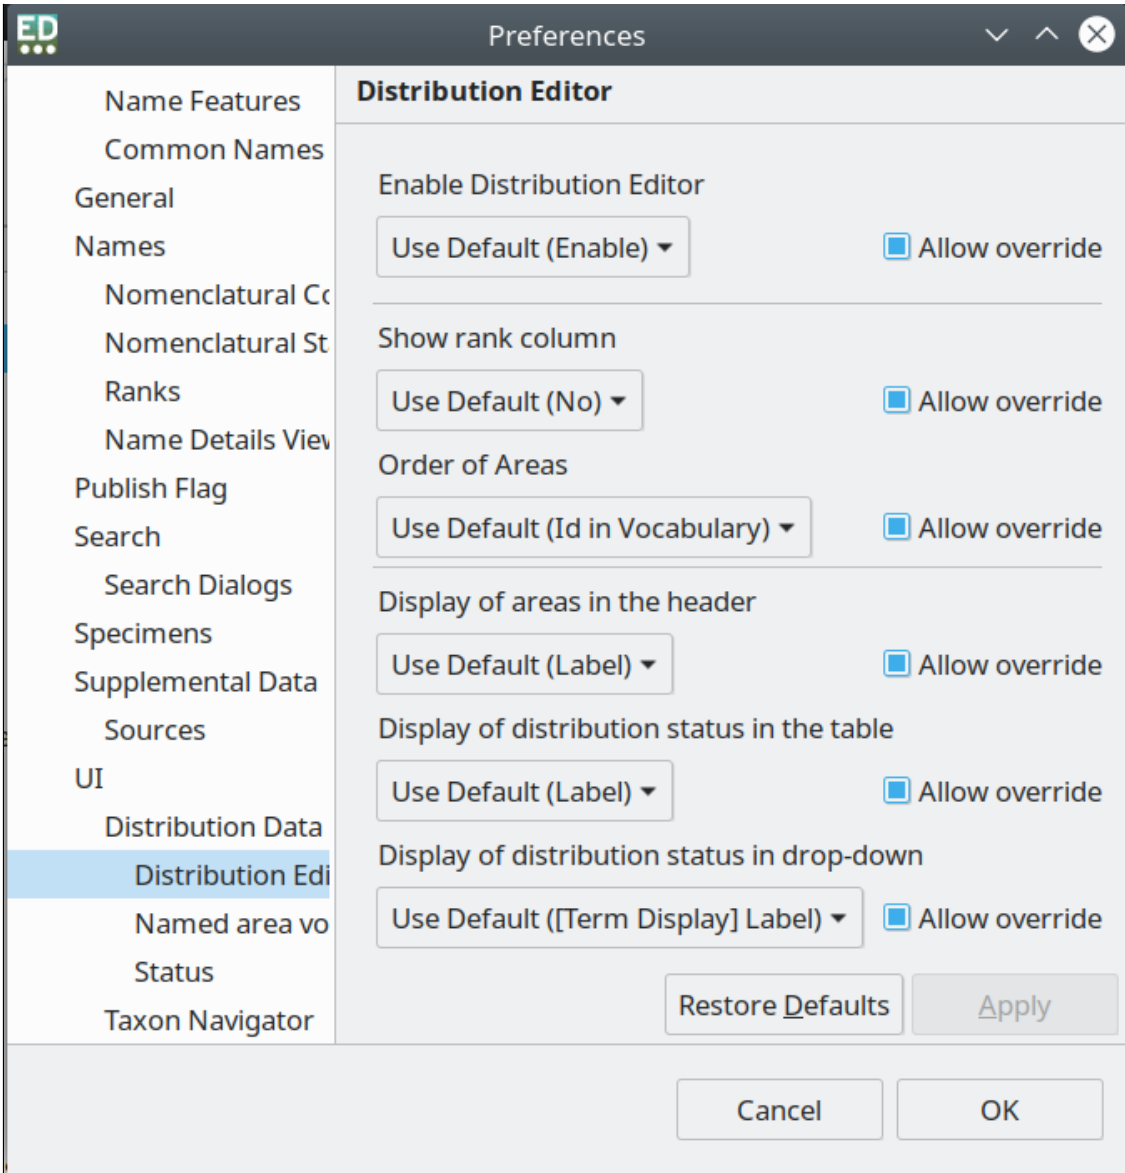

Description

data base: WS1:caryophyllales_demo_01

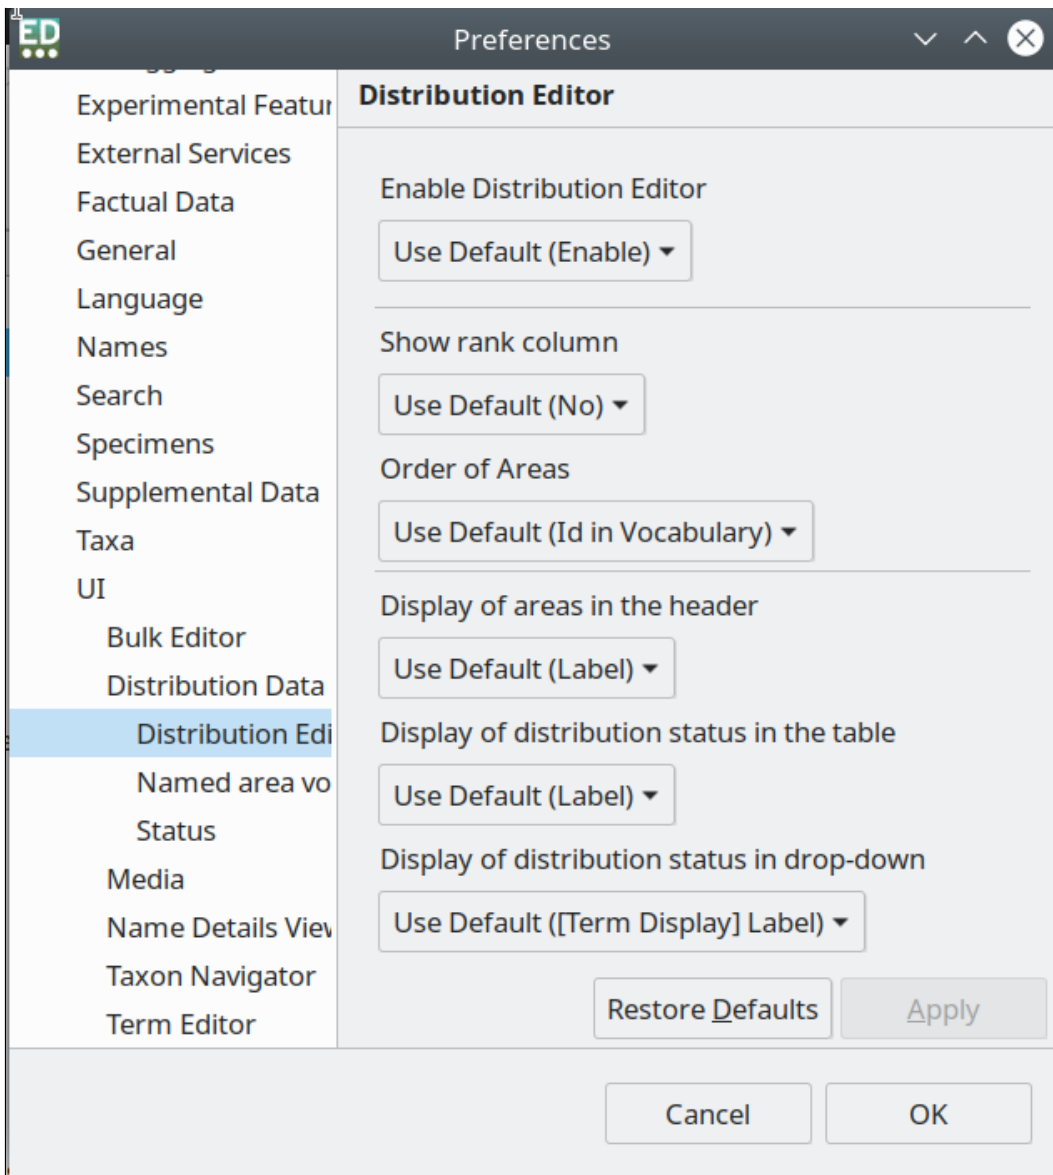

The distribution editor is not available in the context menu:

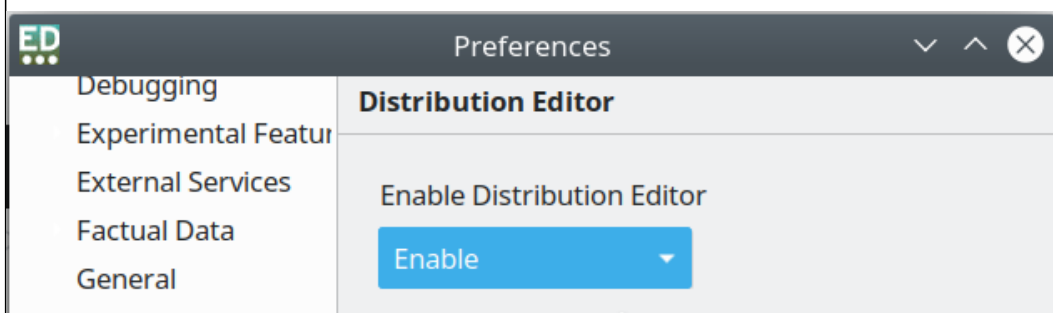

even if enabled in the server side prefs with permission to override locally

the local prefs:

Overriding the server-side setting with "enabled" lets the menu entry show up:

this creates the following **commented** lines in the

```
~/cdmLibrary/.metadata/.plugins/org.eclipse.core.runtime/.settings/eu.etaxonomy.taxeditor.store.prefs
```

```
//distribution.editor.activated_OVERRIDE__edit-WS\ I/caryophyllales_demo_01=true
//distribution.editor.activated_edit-WS\ I/caryophyllales_demo_01=true
```

switching back to "default" does not reproduce the original effect

this removes this line:

```
//distribution.editor.activated_OVERRIDE__edit-WS\ I/caryophyllales_demo_01=true
```

removing the second line does reproduce the effect, To actually see the effect the editor must be restarted

```
//distribution.editor.activated_edit-WS\ I/caryophyllales_demo_01=true
```
