But maybe also Andreas K. needs to look at the code

Can you provide an example url?

Maybe this ticket also covered the "freetext" description ordering like on http://caryophyllales.org/cactaceae/cdm_dataportal/taxon/b15ec01d-b909-4143-b197-e752b6f34d5b

Currently only a flat list is created. I opened a new ticket to discuss if also the hierarchical structure should be reflected: [#8973](#)

Andreas K., can you please check if the existing indentation is caused by (wrong) handling of tree hierarchy or by a wrong general formatting/css?

I could image that it reflects the 2nd level of hierarchy but in the given case (e.g. http://caryophyllales.org/cactaceae/cdm_dataportal/description/f4fc4b11-90c7-4a02-b236-2d58f5891e6e) it does not make sense as there are no 1st level data. This is also strongly related [#8973](#) then.

This is the only open issue which is not handled in other tickets yet. So we can close ~~this~~ ticket once the indentation is checked.

=> move this to [#8798](#)

- Status changed from *Feedback* to *Closed*
- Assignee changed from *Andreas Kohlbecker* to *Patrick Plitzner*
- % Done changed from *80* to *100*

I move the indentation issue to [#8798](#) as it fits better there. And close this ticket.
