

## EDIT - feature request #8706

### taxeditor error report with timestamps

<b>Target version:</b>	Release 5.12		
<b>Severity:</b>	normal		
<b>Description</b>			
<p>Wie wäre es wenn wir dem Fehlerprotokoll mal einen Timestamp spendierten? Damit wäre es leichter den Fehler einem bestimmten Server Problem oder Zustand zuzuordnen. Ich schlage zwei timestamps vor:</p> <ol style="list-style-type: none"><li>1. local date time</li><li>2. last server response date time</li></ol> <p>Die "last server response date time" sollte relativ einfach aus der HTTPInvoker Komponente zu bekommen sein. So wie überall in Spring, müsste es auch hier möglich sein, sich mit einem eigenen Bean hier einzuklinken, um dann denn "Date" HTTP-Header jeder Serverantwort in eine "Session-Variable" von Eclipse oder Spring zu speichern.</p> <p>Beispiel für einen HTTP-Date-Header:</p> <p>Date: Tue, 19 Nov 2019 07:16:35 GMT</p>

I guess we can close this ticket. Timestamping generally works. Open new ticket if there are open issues left.
