

EDIT - feature request #8777

Make visibility of CDM Source configurable

12/17/2019 03:00 PM - Andreas Müller

Status:	Resolved	Start date:	
Priority:	Priority14	Due date:	
Assignee:	Katja Luther	% Done:	0%
Category:	taxeditor	Estimated time:	0:00 hour
Target version:	Release 5.45		
Severity:	normal		
Description			
see #8688 , for some projects the CDM Source should not be visible (because not used). This is similar to ID in Source and ID Namespace visibility.			
====			
Alternatively or additionally it might be also interesting to show the field only if data exists (which is not very often the case) as it is read-only and must not be visible if no data exists. But I don't know if this is easy to implemenent.

#3 - 12/17/2019 03:03 PM - Andreas Müller

- Tags set to euro+med

#4 - 12/17/2019 03:08 PM - Andreas Müller

... hmm, maybe an even better solution is to show the field only if data exists. Is this possible?

#5 - 12/17/2019 03:35 PM - Andreas Müller

Andreas Müller wrote:

If we do so, we could also make all other fields invisible as they are alternative fields (either .. or ..) or implement [#8778](#)

- Related to feature request #8778: Have explicit subclass for CdmSourceLink sources added

#7 - 01/16/2020 01:04 PM - Katja Luther

- Target version changed from Release 5.12 to Release 5.13

#8 - 03/05/2020 03:21 PM - Andreas Müller

- Description updated

#9 - 03/09/2020 04:29 PM - Andreas Müller

- Target version changed from Release 5.13 to Release 5.14

#10 - 04/08/2020 03:49 PM - Andreas Müller

- Target version changed from Release 5.14 to Release 5.15

#11 - 04/22/2020 11:40 AM - Katja Luther

- Target version changed from Release 5.15 to Release 5.18

#12 - 04/22/2020 12:04 PM - Andreas Müller

- Tags changed from euro+med to euro+med, additivity

- Target version changed from Release 5.18 to Release 5.15

CDM Source has primarily been introduced by additivity but it has negative impacts on other DBs. Therefore I add the additivity tag to this ticket and move it to current milestone. Please move back again if you think it can't be handled here.

If we do so, we could also make all other fields invisible as they are alternative fields (either .. or ..) or implement [#8778](#)

That was not fully correct. CDMSource is a read only field which is only needed if data exists. So for now I tried to implement it this way.

#21 - 07/29/2022 06:05 PM - Andreas Müller

Query to find example:

```
SELECT *  
FROM OriginalSourceBase osb INNER JOIN DescriptionElementBase deb ON deb.id = osb.id  
WHERE osb.cdmSource_id IS NOT NULL;
```

```
SELECT osb.id, osb.cdmSource_id, db.titleCache  
FROM OriginalSourceBase osb INNER JOIN DescriptionBase_OriginalSourceBase MN ON MN.sources_id = osb.id  
INNER JOIN DescriptionBase db ON db.id = MN.DescriptionBase_id  
WHERE osb.cdmSource_id IS NOT NULL;
```
