

## EDIT - bug #8860

### Sec reference not inherited from classification anymore

<b>Description</b>			
When adding a (root) child node to a classification it used to be that the sec reference for the new taxon was taken from the reference of the classification. This is not the case anymore. Instead no sec reference is added anymore. This regression needs to be reverted so the classification references is taken as sec again (if a reference exists).

ref #8860: fix add classification ref as sec reference

#### History

##### #1 - 03/10/2020 10:02 AM - Katja Luther

- Status changed from *New* to *Resolved*

This seems to be fixed already. I tested on rem\_conf\_am and the new taxon has the reference of the classification as sec reference.

- Status changed from *Resolved* to *In Progress*

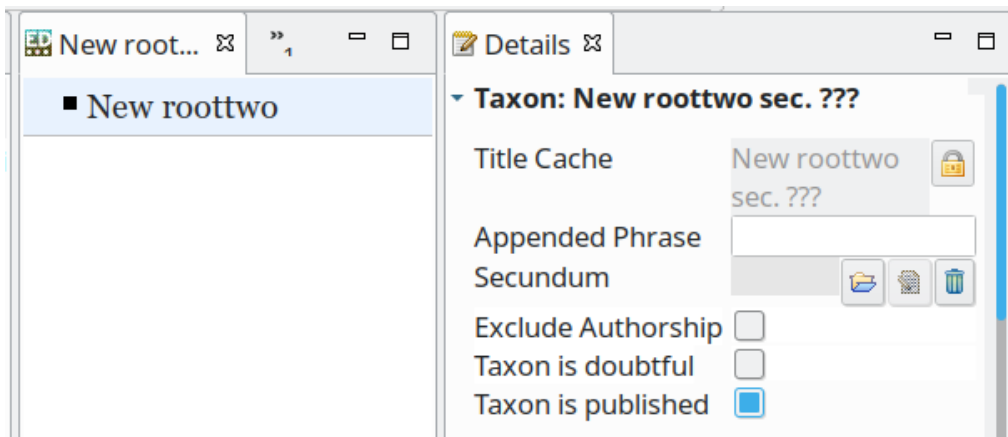

- Assignee changed from *Andreas Müller* to *Katja Luther*

For me this is still not working.

The new Taxon dialog shows the sec.-reference:

But is not being persisted:

I suggest moving this issue to the next target version.

#### #4 - 03/20/2020 04:07 PM - Katja Luther
