Description

Bugs:

- Distribution Data-Status: when opening the status dialog via the table the select area button is not disabled but has no effect as it looks like. Either it should be disabled (as we open the status for a specific area or for default and do not expect to be able to change it) or the changing should have an effect
- TBC

Feature requests:

- Make common name languages a DB Pref too
- Distribution Data-Status: make area specific status editable in local prefs
- TBC
