| <b>Target version:</b>  | Release 5.14 | <b>Found in Version:</b> |           |
| <b>Severity:</b>  | normal       |                          |           |
| <b>Description</b>  |              |                          |           |
| The isAdmin() method uses only the name of the user to check whether the user is admin or not, but should use the role ROLE_ADMIN |              |                          |           |

#### Associated revisions

##### Revision bfedf5f3 - 04/02/2020 12:06 PM - Katja Luther

fix #8925: and fix #8927 use role\_admin for check whether user is admin and check for user\_manager for right to edit pwd
