Now the focus is set explicitly to the moved synonym, so the context menu should be correct. please review

#3 - 04/21/2020 10:20 AM - Andreas Müller

I did not review yet (editor is still building) but forgot to mention in the description that also removing a synonym from the homotypical group of the accepted taxon changes the menu of remaining homotypic synonym in a way that they seem to be heterotypic. Is this also expected to be fixed?

Yes, I think this should be fixed also.

The problem still exists if you directly click on the moved synonym. If you click on another name and back again the correct menu appears. This is the same when moving a synonym into the homotypic group (of the accepted taxon) and when moving it out.

I can't reproduce it when starting from workspace, I will try it again with nightly build.

#8 - 06/16/2020 11:14 AM - Andreas Müller

Did you try again? If not please pass the ticket back to me and I will try again.

Strange, the problem still exists for me:

What I did in rem_conf_am:

- Open taxon "Test" in classification "Testklass"
- Move heterotypic synonym Hetero syn Mill. to homotypic group of accepted taxon
- Wait until everything is fully layouted
- right click on the "Hetero syn Mill." => the above context menu appears

#14 - 06/16/2020 07:25 PM - Andreas Müller

Andreas K., can you also check if you can reproduce this?

When moving out I can not reproduce this anymore. The problem exists only when moving the synonym from a heterotypic group to the homotypic group.
