

EDIT - feature request #8960

Use explicit icon for accepted taxa being basionyms

Severity:	normal		
Description			
Accepted taxa can now be flagged as basionyms in their homotypical group. But there is no icon yet that shows that the accepted taxon is the basionym similar to the dark blue icon for basionym synonyms.			
The icon could be a bit larger or gray instead of black or have an additional frame or something similar.
