Description

To improve the name status entry in Vaadin UI it is proposed to show the fields only if requested.

rename:
Status -> *invalid, illegitimate, or other status*

Show entry, if there is already an entry for a used name, allow to open the status fields.

Currently the fields are shown:
Status type // Reference // Reference detail // Rule considered // Code edition

Reference is restricted to a given list of Codes
Code edition was added, ?? is there a reference behind, is it possible to change these draft entries??

This improvement would be the second step after #8975 has been solved.

I see that there are remaining requests like "Reference is restricted to a given list of Codes
Code edition was added, ?? is there a reference behind, is it possible to change these draft entries??"

However I don't quite understand what exactly should be changed. Could you please open a new ticket for this with improved request description so that we can close this one here?
