

EDIT - bug #9051

Role Project manager should not have right to edit users and creating a new user with missing rights results in two message-boxes

Target version:	Release 5.45	Found in Version:	
Severity:	normal		
Description			
mail AM: Außerdem kommt nach dem Versuch einen User anzulegen, ohne dass man die Rechte dazu hat, erst ein normaler Hinweisdialog, dass „Access denied“ und dann kommt noch der „Unexpected error“ Dialog mit stacktrace unten. Letzteres sollte eigentlich nicht passieren.

How are you able to create a user without permission, the admin menu is available only if you are admin or project manager and having these roles also allows you to create new users?

No this is not true and was obvious in the original mail (2020-06-02): "Hmm, stimmt, ProjectManager scheint dieses Recht nicht zu haben, zumindest bekomme ich auch eine „Access denied“ Fehlermeldung." (a reason why I think that it is always good to cite mail threads more or less in full in tickets)

Außerdem in der Mail:

Das ist wohl auch so gewollt. Du bräuchtest laut <https://dev.e-taxonomy.eu/redmine/projects/edit/wiki/CdmAuthorisationAndAccessControl> noch ROLE_USER_MANAGER, dafür gibt es aber noch keine automatisch angelegte Gruppe. Andreas K., ist das so gewollt oder fehlt diese noch beim FirstDataImporter?

So the error can be reproduced by a project manager without ROLE_USER_MANAGER (I tested on casearia).

I also created a new ticket for the above issue with FirstDataImporter: [#9612](#)

I changed the title of the ticket as the incorrect evaluation of the rights for role_project_manager is the more critical issue here (if this is fixed the other issue is not really relevant anymore)
