

EDIT - feature request #9110

Add additional informations to metadata table of cdmLight

06/30/2020 01:12 PM - Katja Luther

Status:	Feedback	Start date:	
Priority:	New	Due date:	
Assignee:	Katja Luther	% Done:	60%
Category:	cdmadapter	Estimated time:	0:00 hour
Target version:	Release 5.17		
Severity:	normal		
Description			
For the usage of cdmLight in GfBio we need some more information in the metaData table:			
<ul style="list-style-type: none">• creationDate• Base URL of dataportal• licence • tbc • add the information to the cdmLightExportConfigurator • and add a wizard page to the export configuration wizard for the editor

History

#1 - 08/05/2020 01:07 PM - Katja Luther

- Description updated

- Status changed from New to In Progress

#2 - 08/05/2020 01:07 PM - Katja Luther

The changes in cdmlib are done.

#3 - 08/05/2020 01:36 PM - Katja Luther

- Status changed from In Progress to Resolved

The additional wizard page is ready, too.

#4 - 08/05/2020 01:37 PM - Katja Luther

- % Done changed from 0 to 60

#5 - 08/10/2020 12:16 PM - Katja Luther

- Status changed from Resolved to Closed

#6 - 08/19/2020 08:41 PM - Andreas Müller

- Target version changed from Release 5.18 to Release 5.17

#7 - 09/07/2020 05:18 PM - Andreas Müller

- Tags set to gfbio

- File picture290-1.png added

- Status changed from Closed to Feedback

Some of these new data seem to be very GfBio specific so I wonder if we should have them in the ordinary workflow or only if some flag (include GfBio Data) is checked.

Also the new page is completely missing a title or any other sort of explanation what kind of data should be entered here.

Some labels to me are not self-explaining such as "Base URL" (better data portal base URL?, what about webservice base URLs?) and location?

When exactly are these data needed. Can they maybe added later when the data is processed for GfBio?

Also I wonder if this data should be stored somewhere in the CDM (or in the local preferences?)? Probably these exports should be done from time to time and the user does not want to add them each time manually. We have similar issues with DwC-A exports where we need to store such "project metadata" somewhere.

The screenshot shows a web form with the following fields:

- Title
- Description
- Creator
- Contributor
- Language: English
- Dataset landing page
- Dataset download link
- Base URL
- Recommended citation
- Location
- Keywords
- Licence

Navigation buttons at the bottom: < Back, Next >, Finish, Cancel.

Should we create new tickets for these issues?

You are right, I will add this information and a title

Some labels to me are not self-explaining such as "Base URL" (better data portal base URL?, what about webservice base URLs?) and location?

When exactly are these data needed. Can they maybe added later when the data is processed for GfBio?

I think this is more difficult to add this to the csv files or while processing it, because this should be done automatically and the user creating the export knows best about the meta data

Also I wonder if this data should be stored somewhere in the CDM (or in the local preferences?)? Probably these exports should be done from time to time and the user does not want to add them each time manually. We have similar issues with DwC-A exports where we need to store such "project metadata" somewhere.

This is a good idea, I will create a new ticket.

The image shows a screenshot of a web-based metadata form. The form has a light blue header with a logo on the left and window control buttons (minimize, maximize, close) on the right. The main content area is a light gray box containing several input fields. The fields are labeled on the left and have corresponding input boxes on the right. The labels are: Title, Description, Creator, Contributor, Language, Dataset landing page, Dataset download link, Base URL, Recommended citation, Location, Keywords, and Licence. The 'Language' field is a dropdown menu currently showing 'English'. At the bottom of the form, there are four buttons: '< Back', 'Next >', 'Finish', and 'Cancel'. The 'Finish' button is highlighted in blue.

Should we create new tickets for these issues?
